

Northshore Utility District

Resolution No. 2010-03-01

SECTION 2.00 WATER SERVICE RATES

The bimonthly water service charge includes a fixed base rate and a usage charge based on water consumption. The base rate for residential water customers shall be charged based on the number of dwelling units. The base rate for water service to non-residential properties shall be determined by meter size. The usage charge for all service classes is based on the volume of water consumed during the bimonthly billing period. The usage charge ranges from \$2.50 to \$4.75 per CCF of water usage.
