15.00 ADMINISTRATIVE DETERMINATIONS

16.00 EFFECTIVE DATE

17.00 SAVING CLAUSE

A RESOLUTION of the Board of Commissioners of Northshore Utility District, establishing and adopting District water, sewer, and street lighting utility rates and charges and establishing policies and procedures for the assessment, administration, and collection thereof.

WHEREAS, the Board of Commissioners of the Northshore Utility District previously adopted Resolution No. 2011-07-03 on July 18, 2011, establishing District utility rates and charges and setting forth policies and procedures for the assessment, administration, and collection thereof; and

WHEREAS, subsequent to the adoption of Resolution No. 2011-07-03, as set forth above, the District has revised such District utility rates and charges and certain policies and procedures relating to the assessment, administration, and collection; and

WHEREAS, it is desirable and in the best interest of the residents of the District and users and potential users of the District's sewer and water systems that such resolutions and the District's policies and procedures relating to the assessment, administration, and collection of District utility rates be consolidated; now, therefore,

BE IT RESOLVED by the Board of Commissioners of Northshore Utility District of King County, Washington, as follows:

SECTION 1.00 SEWER SERVICE RATES

Section 1.01 Residential

Sewer service to single-family homes shall be charged a base fixed rate plus a usage charge. The sewer usage charge shall be \$3.75 per 100 cubic feet (CCF) of "indoor water consumption" in excess of 15 CCF per two-month billing period. Once started, the usage charge is assessed for all billings until a new "indoor water consumption" level is established.

"Indoor water consumption" shall be defined as the lowest non-zero usage by billing period for the preceding twelve months. A new account is assigned an initial indoor water consumption of 15 CCF per two-month billing period until it is replaced by actual consumption statistics from its billing history.

Sewer service to other residential properties shall be charged only a fixed base rate. The bimonthly sewer base rate per residential dwelling unit shall be as follows:

Class 1 -	Single-family Homes	\$92.20
	(Including individually metered multiple-family dwellings)	
	Plus the usage charges described above.	

Class 2 -	Two to Four Unit Residential Structures (Duplexes, triplexes and fourplexes, with a shared water meter)	\$84.20
Class 3 -	Apartments (Five or more unit residential complex, with a shared water meter)	\$76.20
Class 4 -	Condominiums and Townhouses (With a shared water meter)	\$76.20
Class 5 -	Mobile Home Parks	\$83.20

Units billed include all occupied space for residence or office, adjusted to the average number of mobile homes parked in the park per two month billing period; provided, however, it will be presumed that all the mobile home spaces are occupied, unless within 30 days of the billing thereof, the owner presents evidence to the satisfaction of the District General Manager of the actual average monthly occupancy of the mobile home spaces.

Section 1.02 Non-residential

Sewer service to non-residential properties shall be charged bimonthly a fixed base rate plus a usage charge as follows:

Class 6	Wet Laundries & Dedicated Carwash Supply Lines	\$94.70
---------	--	---------

This class applies to Wet Laundries and Carwash facilities that have dedicated water meters independent of, and separate from, all other use.

In addition to the above base rate, there shall be a consumption charge based on water usage in excess of the first 15 CCF, within the bimonthly billing period, of \$4.37 per CCF.

The rates in this class reflect a 3% evaporation allowance. A wet laundry or carwash business without its own dedicated supply water meter will not be allowed this Class 6 rate classification; it shall be classified as Class 7.

Class 7	Non-residential	\$97.20
---------	-----------------	---------

This includes all other classes of sewer service not otherwise specified. In addition to the above base rate, there shall be a

consumption charge based on water usage in excess of the first 15 CCF within the bimonthly billing period, of \$4.50 per CCF.

Section 1.03 Other Wastewater Collection Services

All other collection/disposal services including wastewater from main flushing, construction, de-watering, fire flow testing of private properties, and other sources will be charged at a rate of \$5.40 per CCF.

Section 1.04 Monitoring Charges and Surcharge Billings

Certain sewage collection connections are assessed a monitoring surcharge, a heavy metals surcharge, or an oil and grease surcharge by King County – Department of Natural Resources and Parks. The above-described surcharges shall be passed through to the responsible party at the stated cost charged by King County plus a ten percent (10%) overhead for District handling.

SECTION 2.00 WATER SERVICE RATES

The bimonthly water service charge includes a fixed base rate and a usage charge based on water consumption. The base rate for residential water customers shall be charged based on the number of dwelling units. The base rate for water service to non-residential properties shall be determined by meter size. The usage charge for all service classes is based on the volume of water consumed during the bimonthly billing period. The usage charge ranges from \$2.75 to \$5.00 per CCF of water usage.

Usage Volume in 100-cubic Feet (CCF)	Bimonthly Base Charge	Usage Charge per 100- Cubic -Feet (CCF)
--------------------------------------	-----------------------	---

Section 2.01 Residential

Class 8 – Single-family Homes (Including individually metered multiple-family dwellings)

Up to 12 CCF	\$30.00	\$2.75
Next 3 CCF		\$3.25
Next 8 CCF		\$4.00
Additional CCF		\$5.00

Usage Volume in 100-cubic Feet (CCF)	Bimonthly Base Charge	Usage Charge per 100- Cubic -Feet (CCF)
--------------------------------------	-----------------------	---

Class 9 – 2 to 4 Unit Residential Structures (duplexes, triplexes and four-plexes) with a shared meter.

Up to 8 CCF times No. of units	\$27.50	\$2.75
Next 2 CCF times No. of units		\$3.25
Next 2 CCF times No. of units		\$4.00
Additional CCF		\$5.00

Class 10 - Apartments Five or more units residential complexes with a shared meter

Up to 8 CCF times No. of units	\$27.50	\$2.75
Next 2 CCF times No. of units		\$3.25
Next 2 CCF times No. of units		\$4.00
Additional CCF		\$5.00

Class 11 - Condominium and Townhouses with a shared meter

Up to 8 CCF times No. of units	\$27.50	\$2.75
Next 2 CCF times No. of units		\$3.25
Next 2 CCF times No. of units		\$4.00
Additional CCF		\$5.00

Class 12 - Mobile Home Parks with a shared meter

Up to 8 CCF times No. of units	\$28.00	\$2.75
Next 2 CCF times No. of units		\$3.25
Next 2 CCF times No. of units		\$4.00
Additional CCF		\$5.00

Units billed include all occupied spaces for residences or offices, adjusted to the average number of mobile homes parked in the mobile home park per bimonthly billing period; provided, however, it will be presumed that all the mobile home spaces are occupied, unless within 30 days of the billing, the owner presents evidence to the satisfaction of the District General Manager of the actual average monthly occupancy of the mobile home spaces.

Section 2.02 Irrigation Meters

All meters, including those installed within a residential complex, obtained for the purpose of irrigation shall be charged non-residential water rates according to the size of the meter installed.

Section 2.03 Non-residential, including all irrigation meters.

Usage Volume in 100-cubic Feet (CCF)	Bimonthly Base Charge	Usage Charge per 100- Cubic -Feet (CCF)
--------------------------------------	-----------------------	---

Class 13 - Non-residential up to ¾-Inch Meter

Up to 12 CCF	\$30.00	\$3.55
Next 3 CCF		\$3.70
Next 8 CCF		\$3.85
Additional CCF		\$4.05

Class 14 - Non-residential 1-Inch Meter

Up to 20 CCF	\$60.00	\$3.55
Next 5 CCF		\$3.70
Next 13 CCF		\$3.85
Additional CCF		\$4.05

Class 15 - Non-residential 1½-Inch Meter

Up to 40 CCF	\$120.00	\$3.55
Next 10 CCF		\$3.70
Next 27 CCF		\$3.85
Additional CCF		\$4.05

Class 16 - Non-residential 2-Inch Meter

Up to 64 CCF	\$200.00	\$3.55
Next 16 CCF		\$3.70
Next 43 CCF		\$3.85
Additional CCF		\$4.05

Usage Volume in 100-cubic Feet (CCF)	Bimonthly Base Charge	Usage Charge per 100- Cubic -Feet (CCF)
--------------------------------------	-----------------------	---

Class 17 - Non-residential 3-Inch Meter

Up to 140 CCF	\$380.00	\$3.55
Next 35 CCF		\$3.70
Next 93 CCF		\$3.85
Additional CCF		\$4.05

Class 18 - Non-residential 4-Inch Meter

Up to 240 CCF	\$630.00	\$3.55
Next 60 CCF		\$3.70
Next 160 CCF		\$3.85
Additional CCF		\$4.05

Class 19 - Non-residential 6-Inch Meter

Up to 540 CCF	\$1,200.00	\$3.55
Next 135 CCF		\$3.70
Next 360 CCF		\$3.85
Additional CCF		\$4.05

Class 20 - Emergency Use

The rate for the use of water in the event of an emergency as determined by the District shall be \$5.00 per CCF.

Class 21 - Wholesale Water

The wholesale water rate shall be an amount equal to the average cost of wholesale water, purchased from the Seattle Public Utilities (SPU), plus forty percent (40%) of said amount. If such sale/use of wholesale water is responsible for the "peaking penalty" under the District's supply contract with SPU, the wholesale customer shall be charged for the proportionate penalty charge billed to the District by SPU. (See Section 13.05 on Minimum Billing.) Early payment discounts (Section 6.06) shall not apply to Wholesale Water billings.

Class 22 - Fire Protection Water

All water used for fire protection, including for drills, will be billed at \$3.55 per CCF.

SECTION 3.00 STREET LIGHTING SERVICE RATES

Section 3.01 Residential

Class 23 - Single-family Residence

There shall be a charge of \$6.00 per bimonthly billing period per single-family residence situated within a lighting area.

Class 24 - Multiple Residential Complexes

There shall be a charge of \$2.75 per bimonthly billing period per multiple residential units located within a multiple residential complex; including apartments, condominiums, mobile home parks, duplexes, triplexes, four-plexes, and other multiple unit dwelling complexes situated within a lighting area.

Section 3.02 Non-residential

Class 25 - Non-residential Lighting Area

There shall be a charge of \$9.50 per bimonthly billing period for all non-residential establishments per account situated within a lighting area.

Class 26 - Requested Special Installation of Residential Light Charges

There shall be a charge of \$30.00 per bimonthly billing for each standard residential light installed at the request of a particular homeowner.

SECTION 4.00 CITY FRANCHISE FEES

Service properties shall be charged for franchise fees assessed by the respective city in which they are located. With the exception of properties located within the City of Kirkland, franchise fees charged shall be shown as a line item in the amount assessed by the respective city without add-on from the District.

Per the franchise agreement, franchise fees for the City of Kirkland shall be included in utility service rates for properties located within the City limits. Instead of a separate line item, the Kirkland franchise fee will be collected as a incremental multiplier of 1.1284 for the water, sewer, and street light service rates described in Section 1.00 thru Section 3.00.

SECTION 5.00 USER CLASSIFICATION FOR ALL SERVICES

Section 5.01 Condominiums and Townhouses

For the purpose of regular service billing, multiple residential dwellings such as condominiums and townhouses with individual water meters installed for each unit are considered Class 1 for sewer service and Class 8 for water service. Condominiums and townhouses without individual water meters installed for each unit are considered Class 4 for sewer service and Class 11 for water service.

Section 5.02 Multiple-Dwellings

In the case of a multiple dwelling unit complex, the entire complex is viewed as a whole. For example: the accounts for several four-unit buildings, clustered within the same apartment complex, are billed as apartments. On the other hand, a stand-alone four-unit building in a single tax lot is considered a four-plex.

Section 5.03 Single-family Homes

For bimonthly regular service billing purposes, a “single-family” shall mean a property that meets all of the following requirements:

- The property must be a residential home or a mobile home on a separate tax lot with less than 10,000 square feet of living space.
- The property is not used for business or activities catering to the public. A home business that offers its goods and/or services to the public through signage, yellow pages or other forms of advertising will not be classified as a single-family home.

Properties that fail to meet all of the above requirements shall be considered Class 7 for sewer service and Class 13 to 19 for water service.

Section 5.04 Accessory Dwelling Unit (ADU) Used as Rental Unit

A tenant-occupied ADU (see Section 6.01) will cause the host single-family home to be reclassified as a multiple-family dwelling and it will be billed as class 2 for sewer service, class 9 for water service and class 23 for street light service.

Section 5.05 Group and Assisted Living Facilities

A group or assisted living facility, located in a single-family structure, is classified as a single-family residence. A group or assisted living facility located in a multi-family structure or complex will be classified as either multi-family or commercial as is appropriate.

Section 5.06 Mixed Use Properties

For those structures or properties that combine both commercial and residential use, two separate meters will be required. One meter will be installed for commercial use and one meter will be installed and designated for domestic residential use. In the

absence of separate metering, the entire tax lot will be billed as non-residential (Class 7 for sewer service and Class 13-19 for water service).

SECTION 6.00 SERVICE CONNECTIONS AND BILLING

Section 6.01 One Meter Per Single-family Service

Each single-family residence shall be served by its own water meter. The only exception shall be where the appropriate land use authority allows an attached or detached guesthouse (an "Accessory Dwelling Unit") under its residential land use rules. Accessory Dwelling Unit (ADU) status shall be established by documentation as required and approved by the District at its sole discretion. The property owner of an ADU must occupy one of the units and the other unit must not be rented in order for the property to qualify as an ADU.

Section 6.02 Non-single-family Connections

There shall be one meter per detached building for non-single-family service connections. However, wet laundry service providers ("Laundromats") and car wash facilities must be connected to the water main directly with their own water meter. Otherwise, they will be billed as Class 7 for sewer service.

Section 6.03 One Account Per Meter

With the exception of meters installed specifically for fire protection purposes (fire sprinkler systems), there shall be one account and one bill per water meter, regardless of the number of units serviced by each meter for water and sewer accounts.

Section 6.04 Bimonthly Billings

There shall be one billing every two months for regular water, sewer, and street light service accounts.

Section 6.05 Combined Bill

For users receiving more than one utility service, there shall be a combined bill.

Section 6.06 Due Date and Discount

Depending on the number of days in the applicable calendar month(s), all bills are due 59 to 62 days from the date of billing. The due date for each billing shall be so specified on the bill. Current charges for water, sewer, and street light services on each billing are subject to a 5% discount for payment received at the District's office within the discount date so specified on the bill (28 to 31 days from the date of billing), provided that the balance outstanding is smaller than or equal to the discount amount available from the prior bill, and the said payment together with the 5% discount so granted is sufficient to pay off the entire account balance. The date of receipt is evidenced by the

date of the District's endorsement stamp on a cancelled check, or the date of transaction approval if payment made by credit or debit card.

Section 6.07 Acceptable forms of payment

Payments made for connections and/or utility services must be in a form acceptable to the District. Acceptable forms include checks or money orders drawn on a U.S. bank and payable in U.S. dollars, U.S. currency, or Visa, Mastercard, Discover, and American Express branded credit or debit cards.

Section 6.08 Application of Payments Received

Payments received on combined service account billings shall be applied in the following priority to outstanding account balances where applicable: (1) penalty charges, (2) regularly scheduled installment contract(s) charges due, (3) connection fees, meter application fees or side sewer permit fees, (4) any other remaining past-due balances, (5) city franchise fees, (6) administrative charges, (7) lien interest, (8) current sewer service charges, (9) current street light charges, and (10) current water charges. Any funds remaining after paying the above charges will be used to reduce the principal due on any existing connection charge installment contract(s). Credit remaining after exhausting all charges due will be kept on account as a credit against future charges.

Section 6.09 Property Owners Billed and Duplicate Billing

The District's accounts are kept in the name of the legal owner of the serviced property only. In cases where the address of the owner is other than the address of the real property receiving service, billings for service charges shall be mailed directly to the real property owner at the owner's address, except as provided in Section 6.09. A property owner or the owner's representative may request in writing that a duplicate bill be sent to a tenant occupying said property. The duplicate bill shall be addressed to the "Resident." The property owner shall notify the District of any changes in tenancy and shall at all times remain responsible for any unpaid charges. There shall be a charge for a duplicate bill as set forth in Section 13.04 below. If the property owner is currently paying any connection fees under an "installment contract", the District will decline duplicate billing requests for the property in question. If a tenant receiving a utility bill under this section files for protection under the United States Bankruptcy Code, the District will discontinue billing said tenant without further notice to the property owner.

Section 6.10 Designation of a Representative

A real property owner may designate a representative to receive billings for service charges at an address other than the address of the serviced property or the address of the owner. To designate a representative, the owner must deliver to the District a properly executed and notarized "Release to Bill Non-Owner" form issued by the District, or if said owner has designated in writing an agent to manage the owner's real property, said agent shall deliver a copy of the written property management agreement to the District signed by the owner.

After receipt of said Release or management agreement, the District shall mail all bills and notices for the account to the representative designated by the owner in the Release or the agent designated by owner in the property management agreement. The District shall not be responsible for, and the property owner shall pay, any charges or damages to the District resulting from representative's failure to pay District charges or to perform any act required by the District. Owner must advise the District in writing of any change of representative or the termination of the property management agreement with the agent.

SECTION 7.00 DELINQUENT UTILITY SERVICE ACCOUNTS

The District shall enforce delinquency collection on all accounts with a past due balance of over \$10.00, in accordance with chapter 57 of RCW.

Section 7.01 Delinquent Accounts

All charges unpaid after the specified due date on each bill as set forth in Section 6.06 shall be delinquent. A penalty charge computed at a rate of 10% of the delinquent amount shall be added to the account balance. Additional penalty charges shall not be computed on prior late charges or on a delinquent amount previously charged a penalty charge.

Section 7.02 Past Due Reminder

Fifteen (15) days after an account becomes delinquent, the District will send out a "Past Due Reminder." The reminder will go to the property owner, and where applicable, the designated representative (Section 6.09) and "Resident" (tenant). There shall be a charge of \$3.50 for each address to which the reminder is sent.

Section 7.03 Service Termination Notice

Thirty (30) days after an account becomes delinquent, the property owner, representative or "Resident" (tenant), if any, shall each be sent a Service Termination Notice, which shall specify the amount which is delinquent, plus penalty charge; it is also provided that a Service Termination Notice shall not be sent until the delinquent amount, plus penalty charge, is \$75.00 or more. The delinquent amount, plus penalty charge, must be paid in cash or by check/credit card and received at the District office within seven (7) days of the date of the notice to avoid service termination and the related service termination charge; provided, however, that if said delinquent account has had more than one "Payment Reversal Charge" authorized in Section 13.01 below, the delinquent amount plus penalty charge must be paid in cash, by certified check, money order, or credit card. A "required payment date" seven (7) days after the date of the notice and the "required payment amount" shall be specified in each notice.

There shall be a \$23.00 charge for the Service Termination Notice. The notice shall be personally delivered to the site address and also sent by mail. The notice will be

fastened to the front door of the service address, if possible, and actual proof of receipt by the property owner or occupant of the serviced property is not required.

This section shall not apply to an account with a documented Kidney Disalysis patient living on-site. As evidence, the District will require written documentation of dialysis from the patient's medical doctor.

Section 7.04 Appeal Hearing

In the event the property owner or "Resident" (tenant) believes there is an error in the billing or in the event the property owner or "Resident" (tenant) disputes the amount due set forth, the property owner or tenant shall be entitled to a hearing before the General Manager, or his/her designee, prior to termination of service, PROVIDED THAT a written request for such hearing is received by the General Manager no later than the close of business on the day before the payment due date. At such hearing, the property owner or "Resident" (tenant) shall have the opportunity to present oral or written information in support of his/her claim of error or irregularity. After giving careful consideration to any information presented, the General Manager or his/her designee shall make any adjustment in the bill he/she believes is fair and equitable. The decision of the General Manager in this regard shall be in writing and shall be final and conclusive. The Board of Commissioners shall be notified of such appeals.

Section 7.05 Notice of Intention to File Lien (NIFL)

Thirty (30) days after an account becomes delinquent, the District shall send a letter to the property owner(s), lender(s) and/or lien holder(s) of record of the delinquent property. The letter shall notify the interested party(ies) of the District's intention to file a lien against the property and to give the interested party(ies) the opportunity to take action to prevent the District's lien filing.

Section 7.06 Failure to Receive a Bill

Failure to receive a bill does not relieve a customer of the responsibility for payment of charges and penalties.

Section 7.07 Service Termination

If a delinquent account is not paid before the required payment date specified on the service termination notice, water service shall be terminated on the date stated on the service termination notice (section 7.03). There shall be a service termination charge of \$46.00. Once a District employee is dispatched to the service property to turn the water off, this charge shall be assessed even if service is not actually terminated. If the meter is not accessible for termination, refer to Section 11.08 of this resolution.

Section 7.08 Reactivation

Service shall be reactivated when the delinquent amount and the penalty charges are paid in cash or by certified check/credit card. There shall be a \$46.00 charge for reactivating service during regular business hours, Monday through Friday, 8:00 a.m. to 4:00 p.m., or a charge of \$76.00 after regular District business hours. When service has been terminated due to lack of payment, the account is limited to one after-hours reactivation every 12 months.

Section 7.09 Reactivation Without Consent

If a previously terminated service is reactivated without written consent of the District by any party, an Unauthorized Reactivation Charge of \$500.00 shall be assessed against the serviced property, regardless of who is actually responsible for the reactivation. Thereafter, the water meter shall be locked. The Unauthorized Reactivation charge must be paid before service will be reactivated.

If the lock on a locked meter is cut or otherwise tampered with, a System Tampering Charge shall be assessed (See Section 8.00). Any resulting damages to the water service lines, equipment or other parts of the public utility system will be repaired at the property owner's expense.

Section 7.10 Temporary Reactivation of Service

If service has been discontinued due to delinquency, an authorized agent of the owner of the service property may request in writing to have the service temporarily reactivated to facilitate the sale of the property. There shall be a **prepaid**, \$80.00 charge for temporary reactivation of service during regular business hours, Monday through Friday . Reactivation shall occur at 10:00 am on the day requested and shall remain active for a period of 24 hours. Service will be terminated at 10:00 am on the next business day. A charge of \$150.00 for service restoration requested outside these hours. The temporary restoration of service shall not exceed twenty-four(24) hours except for on Fridays, when service will be terminated at 10:00 am the next business day.

Section 7.11 Lien and Foreclosure

The policy concerning lien and foreclosure of delinquent accounts shall be as follows:

The "Past Due Reminder" (Section 7.02) will also serve as a notice to the property owner of the District's intent to file a lien against the property receiving service. Should the past due balance remain delinquent for 30 days, the account may be certified as a delinquency and a lien will be filed against the property with the County Recorder in which the real property is located. The account will be assessed a Lien Processing charge of \$180.00 for each lien filing and subsequent release of specific lien against the property. An interest charge of prime rate plus 4% per annum will also be assessed against the delinquent amount commencing on the date of certification of the lien by the County Recorder, to be assessed until the delinquent amount is collected.

A customer or designated representative having an account with a delinquent amount over \$500 for a residential customer or \$1,000 for a commercial customer will be sent a "Past Due Reminder," and the District will notify the lender(s) or lien holder(s) of its intent to file a lien on the property as described in Section 7.05 above. If unpaid, the property will be subsequently "liened" notwithstanding the time requirement in the preceding paragraph.

Action may be taken by the Board of Commissioners to enforce collection of the delinquent amount at any time after said charges have been delinquent for a period of 60 days, pursuant to RCW 57.08.081. The District is authorized to foreclose by civil action in the superior court of the county in which the real property is located, and to request attorneys' fees in such amount as the court may adjudge reasonable. The action shall be *in rem* against the property and in addition may be brought in the name of the District against an individual, or against all of those who are delinquent in one action, and the laws and rules of the court shall control as in other civil actions; it is provided, however, that foreclosure shall not be authorized until the delinquent amount is \$1,000.00 or more. Each account which has been submitted to the District's attorneys for foreclosure shall be charged attorneys' fees and costs incurred related to the foreclosure.

Section 7.12 Release of Lien

The lien filed with the County Recorder shall not be released until the delinquent amount, including late charges and interest, are paid in full.

Section 7.13 Soldiers and Sailors Relief Act

In compliance with the Soldier and Sailors Relief Act of 1940 ("the Act"), the delinquent account collection policies for active military personnel is modified as follows:

- (a) The interest rate and penalty on accounts of active military personnel will be reduced to 6% per annum.
- (b) The Act does not address the District's right to terminate water service for nonpayment pursuant to RCW 57.08.081 for active military personnel with delinquent service accounts. The District, therefore, will not terminate water service to active military personnel with delinquent service accounts without prior approval of the Board of Commissioners, provided sufficient documentation of active duty status is provided to the District.

Section 7.14 Security Deposits in Bankruptcy Filing

The District requires a security deposit from accounts in bankruptcy proceedings for continued utility service beyond the filing date. Such deposit must be made within 20 days after the initial bankruptcy filing, in an amount no less than 110% of the highest total charge billed in any two-month period. Such deposit will be held by the District until the bankruptcy is dismissed or discharged by the court. At such time, the customer may

request to apply the security deposit toward any unpaid charges or a refund, if there is no balance owing. Any unpaid balances remaining on an account after dismissal or discharge of bankruptcy will cause the property to be liened as described in section 7.11 above.

SECTION 8.00 TAMPERING WITH THE UTILITY SYSTEMS

It is a federal offense for anyone to tamper with a public water system (42 **USC** Sec. **300i-1**). In addition to any penalty applicable under the statute, the District shall assess a System Tampering Charge of \$500 for each instance of such tampering. Examples of tampering with the water or sewer system includes:

- gaining unauthorized access to storage sites or other enclosed utility facility sites,
- operating or damaging any system components,
- unauthorized connections to the District's water or sewer system, or
- cutting of locks installed for service termination.

SECTION 9.00 CONNECTION TO AND DISCONNECTION FROM THE WATER OR SEWER SYSTEM

Section 9.01 Commencement of Billing for New Service Connections

Billing for water service commences with the installation of the water meter. Billing for sewer service commences with the approved and inspected side sewer connection. Since charges for these utility services will be assessed regardless of the completion or occupancy of the structure receiving service(s), developers or property owners should not schedule meter installation or side sewer connection inspection until the property is ready for service. No property shall receive water or sewer service until such time as it has a verifiable street address assigned by the appropriate land use authority.

Section 9.02 Disconnection from the Water or Sewer System

- (A) **Sewer Service.** In the event that all improvements are removed from a lot or parcel of real property, upon request from the property owner, the side sewer servicing the property shall be plugged at a location approved by the District. The property owner shall pay all costs of plugging the sewer line and in addition shall pay one-half of the District's current inspection fee (see Section 11.01). During such time when the sewer line is plugged; no sewer service charge shall be assessed against said property.
- (B) **Water Service.** Water service charges to a property that has been receiving water service may be discontinued if the property is receiving no water service and, in addition, one of the following conditions exists:

- (i) The property owner requests in writing that the District remove the meter from the meter box.
- (ii) An existing structure is determined to be unsuitable for human occupancy by the proper governmental agency (See Policy Finance15).

The District shall charge its actual labor and material cost to remove a meter plus an additional charge for administration, overhead, and final bill preparation as set forth in Section 14 below. The minimum charge for this service is \$75.00.

Section 9.03 Resumption of Water and/or Sewer Service(s)

The charge to physically reconnect the meter shall be calculated upon the same basis as the charge to remove the water meter if the meter is reinstalled within 12 months. If the meter is reinstalled after 12 months, the property will be assessed applicable connection charges at the time of reconnection.

The side sewer will be reconnected at the property owner's expense. The reconnection must be inspected by the District for approval. The property owner shall be charged for inspection (see Section 11.01).

The property owner must request reconnection for occupancy or reconstruction. Once reconnected, regular service(s) billing will resume even if the property remains unoccupied due to reconstruction.

Section 9.04 Short-term Disconnection

Short-term disconnection for unoccupied property is handled as described in Section 9.01 through 9.03

Section 9.05 Required Sewer Connection

If required by law or regulations, the owner of each lot or parcel of real property within the area to be served by the sewer system of the District, upon which lot or parcel of real property there shall be situated any improvements designed to be utilized for human occupancy, employment, recreation, or other purpose or use abutting on any street, alley or right-of-way in which there is now located, or may in the future be located, a public sanitary sewer of the District, shall connect such real property at his or her expense to the public sewer system of the District, provided that said public sewer is within 200 feet of the property line of said parcel of real property.

Any improvement or structure hereinafter constructed or made available for human occupancy and use shall, within 60 days after written notification of sewer availability has been issued by the District or the date of the installation of a water meter, whichever occurrence is sooner, shall be connected to the sewer system of the District by the owner of the real property upon which said structure is located at his or her expense.

All property shall be deemed capable of being served by the lines of the District if any plumbing of any building or structure located within 200 feet thereon can be served into the District sewer lines by gravity or by pumping provided the property served shall have direct access to the District's sewer line.

Section 9.06 Charge for District Expense of Making Connections to Sanitary Sewer Facilities

In the event that any owner of property fails or refuses to make connection as required by Section 9.05 above, the Board of Commissioners of the District may cause such connection to be made and the cost thereof to be certified to the County Recorder as a lien against the property served and to be collected as provided by law.

Section 9.07 Exemption from Sanitary Sewer Service Charge

Non-residential water consumption not discharged into the District's sanitary sewage collection system may be exempted from sewer service charges if approved by the District. This applies to irrigation, fire protection, and other uses that will not enter the District's wastewater collection system.

The property owner must apply for a separate water meter, connecting directly to the District's water main, to measure non-sewer water service consumption. Charges for the new meter are as set forth in Section 11.03 below. Along with the application, the property owner must submit a detailed drawing of the non-sewer plumbing system to be serviced by this meter. Upon approval, the District will install the new meter. Water consumption for non-sewer water service use as registered on this meter will be exempt from sewer service charge. If this meter is used at a later date to supply consumption, which eventually enters the District's wastewater collection system without advance notice to and approval from the District, its "exempt" status will be revoked to the date of original installation. The full sewer service charge will be assessed retroactively on all consumption previously exempted.

Section 9.08 Temporary Turn-off Charges for Irrigation and Domestic Meters

Upon written request from a property owner, a water meter may be turned off for a temporary period of time if the structure is vacant. During such time as said meter is turned off, minimum bimonthly water service base charges as set forth in Section 2.00 shall be charged to said property, and all other charges for sewer, street lights, and other applicable charges shall continue to be charged. The District shall charge its actual labor and material cost to turn off a meter plus an additional charge for administration and overhead as set forth in Section 14 below, but in no event shall the charge be less than \$40.00. The charge to turn on the meter shall be calculated upon the same basis as the charge to turn off the meter.

Section 9.09 Service Line Relocations

If a development or a short-plat requires the District to relocate a water and/or sewer service line due to a change in right-of-way, the developer shall be responsible for the costs, including time, materials, equipment, and overhead, incurred by the District. If the District is required to relocate a water and/or sewer service line because a change in the right-of-way is required by a local governmental jurisdiction, the District will absorb the costs of the relocation(s).

SECTION 10.00 CONNECTION CHARGES

Owners seeking to connect property to the District’s sewer and water system which, as legally described and addressed in the application for connection, have never received service, or which, with regard to property already receiving such service, will impose an additional demand upon the District’s water or sewer facilities, shall pay connection charges as determined by the District as a condition of such connection(s). Said charges shall be assessed and administered in accordance with District Policy and Procedure Number ENG5 – Assessment and Administration of Connection Charges.

SECTION 11.00 MISCELLANEOUS FIELD SERVICE CHARGES

Section 11.01 Side Sewer Permit Charge

The District shall charge a side sewer permit fee for each side sewer connection as follows:

Gravity side-sewer requiring only a single inspection	\$250
Pumped side-sewer or other obvious situations requiring two inspections	\$290
Right-of-Way Permits required for side-sewer inspections	\$645
Inspections for customers making minor modifications or repairs to their existing system	No Charge

This charge covers the application and the number of inspection(s) expected for the new connection to the District’s sewage disposal system. Additional inspections, if necessary, will be billed on a time, equipment, and material basis. There shall be a fifty percent (50%) surcharge for inspections requested and performed outside the District’s normal hours of operation.

The District shall charge \$645.00 to each property owner applying for a side sewer permit to pay for charges billed to the District by other municipalities for right-of-way permit fees, inspection fees and any other miscellaneous charges. In addition, the property owner shall pay any charges made by such municipalities in excess of \$645.00.

Section 11.02 Sewer Line Video Service

The District shall charge for video inspection service at a rate of \$1.10 per linear foot of sewer pipe inspected. The minimum charge for this service shall be \$275.00. Charges

in this section cover only the services rendered. Rates for the video truck and related equipment used are billed separately.

Section 11.03 Water Meter Installation Charges

Charges for full service installation of water meter services, including labor and material costs, shall be as follows:

Meter Size	Charge
3/4 inch	\$2,200
1 inch meter	\$2,305

The District shall charge its actual labor and material cost plus an additional charge for administration and overhead as set forth in Section 14 below to install a meter larger than a 1-inch meter; provided, however, there shall be a minimum charge to install a meter larger than a 1-inch meter as follows:

Meter Size	Minimum Charge
1-1/2 inch	\$3,050
2-inch meter	\$3,450
Over 2-inch	\$4,300

A cash deposit equal to the minimum charge shall be required to install a meter larger than 1-inch prior to installation.

Where service line, meter connection and a meter box have been constructed by a developer as part of a water main extension, the meter “set” charges shall be:

Meter Size	“Set” Charge
¾-inch	\$250
1-inch	\$305
1-1/2 inch	\$620
2-inch	\$795

Section 11.04 Storz Adaptor

Where a Storz adaptor is necessary, it will be charged at a rate of \$325 each.

Section 11.05 Sale of Water From Fire Hydrants

The District shall issue water use permits for temporary connection to fire hydrants, filling stations, and other approved District facilities. The person applying for such permit must demonstrate a need for such service to the satisfaction of the District and agree to comply with all requirements of the District relating to said water use permit

1. Hydrant Meter – The District shall provide a hydrant meter for temporary water use that may include a backflow prevention device, connector to the hydrant, and a hydrant wrench.
2. Secured Fill Station – District fill stations maybe available for annual rental. The station will be equipped with an insulated box, meter, backflow prevention assembly, and shut-off valve.
3. District Supervised Fill Station – Supervised access to a fill station as described above is available for daily rental only.

The rates and fees for permits, deposits for use of District meters, and water charges are as follows:

Permit Fee	\$25
Temporary Water Use Annual Deposit - deposits to be applied towards use of water and damages of meters, backflow devices, and fill station equipment	\$2,000
Meter, Backflow & Fill Station Monthly Rental Fee – use deposit required	\$50
Fill Station Daily Rental Fee - (use deposit not required)	\$25/day
Water Cost per CCF - equal to highest usage rate in this resolution.	\$4.75

There shall be a fine of \$500.00 each day or instance, whichever is more frequent, for a connection made to a fire hydrant without the required permit.

Section 11.06 Dedicated Fire Protection Service

There shall be a bimonthly base water service charge for private fire protection of specific non-single-family structure(s). These fire protection connections to the District’s water distribution system are in the form of dedicated or combination fire protection/domestic supply lines that are unmetered or fully to partially metered for their flow capacity. A fully metered connection is charged based on the size of the meter. An unmetered or “partially-metered” fire protection connection is charged based on the size of the backflow prevention device (BFD), if one is installed. If a BFD is not installed, the charge is based on the diameter of the largest segment of the fire protection line.

There shall be a separate fire protection charge for each connection to the District’s water distribution system. Water used for firefighting will be charged based on the registered (or estimated, if not fully-metered) volume per water rates in section 2 of this resolution.

Diameter of largest Water Line, BFD, or Meter installed	Bimonthly Charge
¾ inch	\$7.50
1 inch	\$9.50

1½ inch	\$10.00
2 inch	\$14.00
2½ inch	\$19.50
3 inch	\$24.00
4 inch	\$33.00
6 inch	\$49.50
8 inch	\$76.00
10 inch	\$110.00
12 inch	\$145.00

Fire protection services are administered in accordance with District Policy and Procedure Number Finance16 – Fire Line.

Section 11.07 Temporary Use of Water for Construction

The cost of installing a hydrant meter for construction shall be the same as set forth in Section 11.03 above.

Section 11.08 Inaccessible Meter Charge

Property owners shall not restrict access to the District’s meter boxes for meter reading and repair. An area consisting of a 2-foot radius around and 6 feet above each water meter box shall be kept free of vegetation, debris, or otherwise shall not be made inaccessible. Additionally, if a path is necessary to access the meter, such path shall have a clearance of 2 feet (width) by 6 feet (height) and be free of vegetation or debris. If a meter is inaccessible due to debris, overgrown vegetation, parked vehicle located over the meter box or any other restriction, the property owner shall be assessed an Inaccessible Meter charge in the amount of \$30.00 for each instance that the meter is determined to be inaccessible for attempted meter reading or repair.

If the meter is located in a right-of-way and a vehicle is parked over the meter at the time of scheduled termination or termination resulting from the return of payment by a financial institution, the account will be assessed a \$500 penalty per instance.

SECTION 12.00 CREDIT FOR CONSUMPTION CAUSED BY LEAKAGE

Water leakage in a private plumbing system beyond the water meter is the responsibility of the property owner. The District may grant a partial credit for water consumed in the billing period during which a leak occurred. Upon proof of prompt (within 30 days after learning about the leak) repair, the District may grant a credit for a leak adjustment computed as follows:

- (a). The “Unit Cost Rate” of the wholesale water to the District is computed by dividing the annual water wholesale contract payment amount, for the current year, by the previous year’s consumption in CCF. The current “Unit Cost Rate” is \$2.03 per CCF.

- (b). Credit will be allowed for no more than a 4-month period. In other words, if a leak is left unattended for six months, it will only receive an adjustment credit for up to two consecutive billing periods (4 months) with the highest combined usage volume.
- (c). Applicants must prove that they actually had a promptly repaired leak by producing bills for the repair, parts and materials, and by the return to the normal usage level.
- (d). "Excess Consumption" is defined as usage during a qualified leakage period less consumption from the same period last year ("Normal Consumption"). If the applicant is a new owner, the volume of "Normal Consumption" shall be determined by the average usage, for the same period, by customers in the same rate class.
- (e). The "Recalculated Charge" shall be the sum of water charges for "Normal Consumption" computed at current water rates plus the product of the "Unit Cost Rate" and "Excess Consumption."
- (f). Credit for leak adjustments shall equal to the difference between the water charges as billed for the qualified period and the "Recalculated Charge."
- (g). The leak adjustment credit is available once each contiguous 24-month period. If two leaks occur during a contiguous 24-month period, a credit adjustment for the larger of the two leaks, based on volume, will be granted.

SECTION 13.00 MISCELLANEOUS ADMINISTRATIVE CHARGES

Section 13.01 Payment Reversal Charge

There shall be a charge of \$35.00 for handling a check or ACH transfer which has been dishonored or for a credit card payment which has been charged-back to the District.

- (a) The affected utility service account shall be debited for the amount of the dishonored check or charged-back credit card payment.
- (b) If a discount was allowed for the timely payment as set forth in Section 6.06 above, said discount shall be reversed and the discount amount charged back to the service account.
- (c) All collection steps would resume as if said dishonored check or charged-back credit card payment was never received or made.
- (d) The property owner and the maker of the dishonored check or the owner of the charged-back credit card shall be notified.
- (e) The amount of the dishonored check and "Payment Reversal Charge" must be paid in cash, money order or credit card.

- (f) If an account has two returned or charged-back items within a twelve-month period, the District will only accept cash, money orders, credit card payments, or certified checks from the offending account for the ensuing twelve month period.

Section 13.02 Special Payment Processing Fee

There shall be a charge of 10% of the payment received for the processing of cash payments in the form of loose coins that total more than \$20.00.

Section 13.03 Final Bill Charge

All requests for a final bill must be in writing. There shall be a \$31.50 charge for final bills on accounts receiving water service in all classes and for accounts receiving sewer service in Classes 6 and 7 as defined in Sections 1 and 2 above for the final bill preparation and meter reading, which shall be taken by a District employee. Final bills shall be apportioned based on the escrow closing date if notified prior to said closing date, or the next day after the District receives notice of the transfer of property. When no meter reading is necessary for the final bill preparation, the charge shall be \$10.50.

Final bills covering less than the normal two-month billing period will be computed as follows:

The District will take a meter reading on the closing date for the final bill. The usage from the final reading is divided by the number of days within the current billing period covered by the final bill to get the average daily usage. The average daily usage is multiplied by the number of days in the current billing period to get the estimated full period consumption. A full period bill is then computed using the estimated full period consumption. That amount is divided by the number of days in the billing period to get the average charge per day. The final bill is then prorated to the closing date based on the number of days charged to the departing customer.

Example: A water service customer requested a final bill through July 14 and the next normal bill date was July 31. The District took a meter reading on July 14 and the customer had used 2,200 Cubic Feet of water. There were 44 days from June 1 to July 14. The average daily consumption would be 50 Cubic Feet. The estimated full period consumption would be 3,050 Cubic Feet. The District bills only in 100 Cubic Feet units. The final bill would be computed based on a full period consumption of 30 CCF or 44/60 of the total bill.

Initial billings covering less than the regular two-month billing period will be prorated. The part period bill will be computed in a manner similar to a prorated final bill as described above.

Section 13.04 Duplicate Bill Charge

There shall be a charge of \$1.50 per bill for duplicate bills sent to a tenant, addressed to "Resident" at the service address, upon request in writing from the property owner, or his legal agent. If the property owner is currently paying connection fees included with the regular water and/or sewer services bill under an "installment contract", the District reserves the right to deny any duplicate billing requests.

Section 13.05 Minimum Billing Charge

There shall be a minimum billing charge of \$25.00 per invoice for miscellaneous billings; provided, however, that an individual may pay in cash the District's actual charges rather than a \$25.00 minimum bill at the time of service or material is provided.

Section 13.06 Account History Charge

Account histories are available on-line from 2009 forward and are available at no charge. Account histories prior to 2009 are available for a charge of \$.25 for each page printed. All requests for account histories not available online must be made in writing and in acknowledgement of the applicable fees.

Section 13.07 Charge for Copy of Bill

The District shall charge \$1.50 for each copy of a customer's bill provided to a District Customer. However, if a copy of a bill is provided to a customer as a result of a billing inquiry, there shall be no charge.

Section 13.08 Charge for Overseas Postage and Handling

The District shall charge \$2.75 for each bill sent to an address outside the United States for postage and handling.

Section 13.09 Unauthorized Connections to Sanitary Sewer and Water Systems

Should any individual, corporation or other entity make a direct or indirect connection from a structure to either the sanitary sewer or water system of the District without first applying and obtaining permission to make a connection, or should a connection be made without inspections being made by the District of the connection, as required by resolution of the District, the same shall be deemed an illegal connection. The District, as a result, will incur substantial expenses for investigation, ascertaining the facts of the illegal connection, and will incur other administrative costs in connection therewith.

Section 13.10 Fee for Unauthorized Connection to Sanitary Sewer System

In addition to the regular service charges, there shall be a charge of \$50.00 per day for illegal connection to the sanitary sewer system from the date of said illegal connection to the date of disconnection. Further, the District shall charge a Connection Charge, as would otherwise be due and payable if said property were legally connected, plus the cost of inspection that would have been conducted had said property been connected legally. The District may disconnect said sanitary sewer connection and charge all costs and expenses incurred in making said disconnection. No further connection will be authorized to said property served by said illegal connection until all costs, charges, and per diem sanitary sewer service charges are paid in full, and the District is fully compensated for all costs and expenses including engineering and attorneys' fees incurred, directly or indirectly, as a result of said illegal connection.

Section 13.11 Fee for Unauthorized Connection to Water System

There shall be a charge of \$50.00 for each instance and each day, whichever is more frequent, an illegal connection is made to the water system. In addition, a consumption fee will be charged based on the discharge rate of the particular service line servicing the connection at the rate of \$4.75 per 100 cubic feet for an 8-hour period of continuous water flow each day until date of disconnection from the system. Further, the District shall charge a Connection Charge, as would otherwise be due and payable if said property were legally connected. The District may disconnect said water connection and charge all costs and expenses incurred in making said disconnection. No further connection will be authorized to said property served by said illegal connection until all costs and charges are paid in full and the District is fully compensated for all costs, and expenses including engineering and attorney's fees incurred directly or indirectly as a result of said illegal connection.

Section 13.12 Delinquent Miscellaneous Service Charges

Charges for any services rendered by the District, including but not limited to Connection Charges, water meter installation charges, miscellaneous water service charges, charges for illegal connections, and all other miscellaneous District charges, shall be paid within 30 days of the date of the District's invoice. All charges unpaid by said date shall be delinquent. A penalty charge computed at a rate of 10% of the delinquent amount shall be added to the account balance. Additional penalty charges

shall not be computed on prior penalty charges or on a delinquent amount previously charged a penalty charge. All District charges, penalties, and interest shall be deemed charges against the real property to which service is provided and shall be enforced pursuant to RCW 57.08.081. The District reserves the right to refer unpaid, non-utility service related charges to a collection agency, as necessary, to ensure payment.

Section 13.13 Fire Flow Estimates

Fire flow estimates prepared by the District or District's consultant using a computer model will be charged at cost to the District plus 25%. If on-site flow tests are needed for the estimate, the service shall be billed on a time and material basis as described in Section 14.

Section 13.14 Water or Sewer Availability Letter

There shall be a non-refundable charge of \$80 for the research and preparation of each water or sewer availability letter. These availability letters are valid for a period of one year. If a time extension is needed, it must be requested prior to the availability letter's original expiration date. The District will review the expiring letter for changed conditions. In the absence of changed conditions, there is no charge for the first extension. Re-issuance of additional service availability letter for the same property, after the first extension or due to changed condition, will be charged \$80 each.

Section 13.15 Release of Unused Easement

Property owners who request the release of easement no longer used by the District will be billed for the costs of record research, attorney's fees, title report, recording fees, and other costs attributable to handling and responding to the request in accordance with Section 14. The property owner must pay a minimum non-refundable deposit of \$100 before such request can be investigated for consideration.

SECTION 14.00 OTHER TIME AND MATERIAL CHARGES

Section 14.01 Service and Equipment

Services rendered and material provided will be billed at a cost plus overhead basis.

- A. Labor service provided by District employees will be billed at 2.25 times the employee's gross hourly wage for the Fleet & Facilities Department and 2.0 times the employee's gross hourly wage for all other departments. Bill rates based on specific service agreement, if any, shall supercede billing rates described herein.
- B. Equipment. The use of the District's equipment will be billed as follows:

Equipment Type	Hourly Rate	Minimum Hours	Minimum Rate
Asphalt Hot Box	\$11.25	2	\$22.50
Hydraulic Power Unit	\$6.00	1	\$6.00
Aerial ManLift – Self Propelled	\$12.25	4	\$49.00
Air Compressor	\$11.25	1	\$11.25
Asphalt Reclaimer	\$3.75	1	\$3.75
Asphalt Roller	\$7.00	1	\$7.00
Backhoe	\$21.50	1	\$21.50
CADD System	\$11.25	1	\$11.25
Chain Saw	\$4.25	1	\$4.25
Compactor	\$4.25	1	\$4.25
Compactor - Backhoe Attachment	\$11.25	1	\$11.25
Concrete Saw	\$7.00	1	\$7.00
Cut Off Saw	\$4.25	1	\$4.25
Forklift	\$6.00	1	\$6.00
Gas Monitor	\$3.75	1	\$3.75
Generator <5 KW	\$3.25	1	\$3.25
Generator – 20 KW	\$8.00	1	\$8.00
Generator – 50 KW	\$17.00	1	\$17.00
Generator – 60 KW	\$17.00	1	\$17.00
Generator – 70 KW	\$34.00	1	\$34.00
Generator – 80 KW	\$34.00	1	\$34.00
Generator – 125 KW	\$34.00	1	\$34.00
Generator – 200-220 KW	\$50.00	1	\$50.00
Generator – 250 KW	\$60.00	1	\$60.00
Hedge Trimmer	\$2.65	1	\$2.65
Hole Hog	\$4.25	1	\$4.25
Hydraulic Impact Wrench	\$2.65	1	\$2.65
Jackhammer	\$4.25	1	\$4.25
Lawn Blower	\$2.65	1	\$2.65
Lawn Edger	\$2.65	1	\$2.65
Lawn Mower	\$2.65	1	\$2.65
Lawn Mower - Riding	\$6.00	1	\$6.00
Meter Tester Portable	\$4.25	1	\$4.25
Pipe Cutter (Snap, Role or Hydraulic)	\$3.20	1	\$3.20
Pipe Threader	\$3.20	1	\$3.20
Pressure Washer	\$3.75	1	\$3.75
Pump - Pressure Tester	\$2.65	1	\$2.65
Pump 1-1/2" to 3"	\$4.25	1	\$4.25
Pump > 3"	\$7.00	1	\$7.00
Pump Electric Sump	\$2.65	1	\$2.65

Equipment Type	Hourly Rate	Minimum Hours	Minimum Rate
Sewer Mini Push Camera	\$11.25	1	\$11.25
Sewer Rodder	\$6.00	1	\$6.00
Sewer Root Cutter	\$3.20	1	\$3.20
Sewer Smoke Tester	\$3.20	1	\$3.20
Sewer Stick Camera	\$3.75	1	\$3.75
Shoring	\$6.00	2	\$12.00
Survey Data Collector	\$22.00	1	\$22.00
Sweeper - Walk Behind	\$2.65	1	\$2.65
Tapping Machine 1-1/2" to 2"	\$3.20	1	\$3.20
Tapping Machine 3/4" to 1"	\$2.65	1	\$2.65

Engineering Copies - Mylar Film "D" size	\$5.00
Engineering Copies - Mylar Film "E" size	\$6.50
Minimum Engineering Copy Charge	\$5.00
Electronic Media – CD	\$5.00

Section 14.03 Mileage

Mileage driven will be charged at 60 cents per mile.

Section 14.04 Other Services and Material Provided

Outside professional services, material, and other costs incurred and paid for by the District will be billed at 1.25 times the cost to the District. Unless the service is specifically covered by a separate service agreement, labor costs will be billed at 2.25 times the actual wage rates paid by the District for all services rendered to cover costs of administration and overhead. If applicable, state excise tax shall be charged in addition to the charges for material and services.

SECTION 15.00 ADMINISTRATIVE DETERMINATIONS

The General Manager or his/her designee may authorize credits on service charges and delinquent penalty charges accrued against properties improved by residential structures which are not completed or which are uninhabitable, or waive delinquent charges where collection of the same would be inequitable, upon such finding by the General Manager or his/her designee, following investigation.

Where service and base service charge are discontinued for reasons stated above, applicable service and connection charge will be assessed for reconnection to the District's collection system.

SECTION 16.00 EFFECTIVE DATE

All rates and charges previously adopted by the Board of Commissioners and in effect at the time of the approval of this resolution shall continue in effect unless and until changed by the Board of Commissioners. All rates and charges contained in this resolution shall

be effective for all billings dated on or after October 8, 2011. Resolution 2011-07-03 is hereby repealed effective September 12, 2011.

SECTION 17.00 SAVING CLAUSE

If any section, sentence, clause or part of this Resolution is for any reason held invalid, such a decision shall not affect the remaining portions of this Resolution. The Board of Commissioners hereby declares that it would have passed this Resolution and each section, sentence, clause, and part thereof despite the fact that one or more sections, sentences, clauses or parts thereof be declared invalid.

ADOPTED by the Board of the Commissioners of Northshore Utility District, King County, Washington, at the regular open public meeting thereof held the twelfth day of September, 2011.

Trudy C. Rolla,
Commissioner

D. Bruce Gardiner,
Commissioner

Robert S. Peterson,
Commissioner

Don A. Ellis,
Commissioner

Margaret R. Wiggins,
Commissioner
